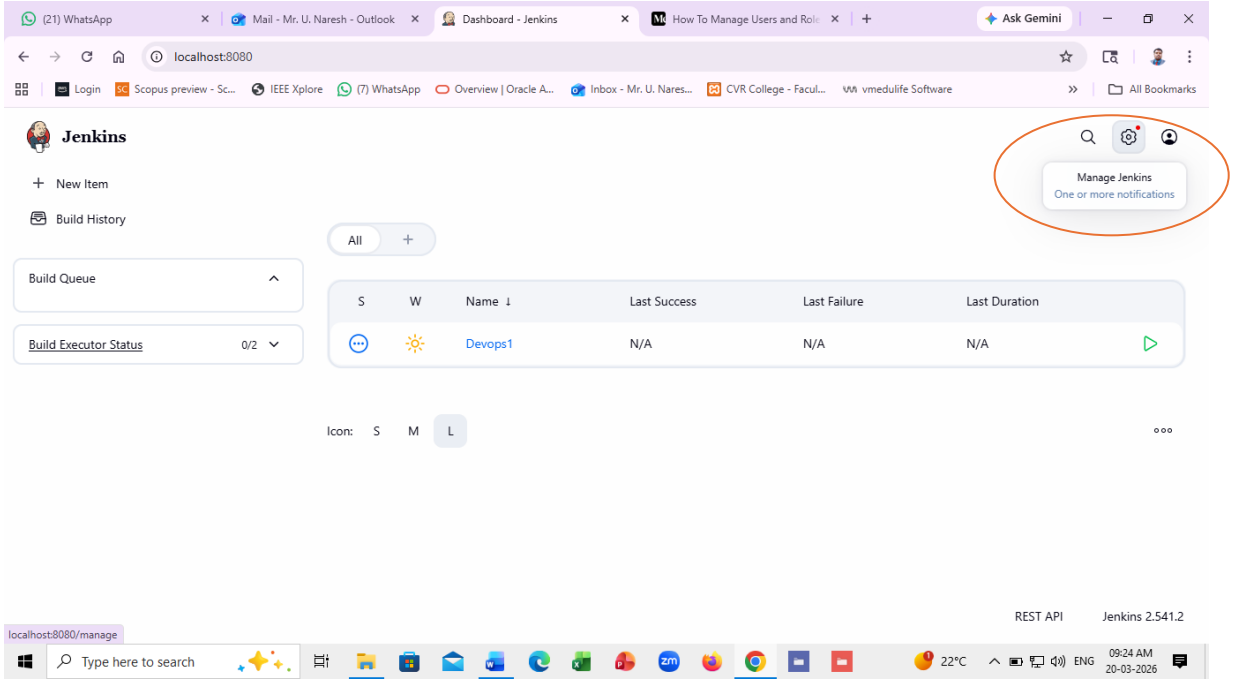
Manage Jenkins

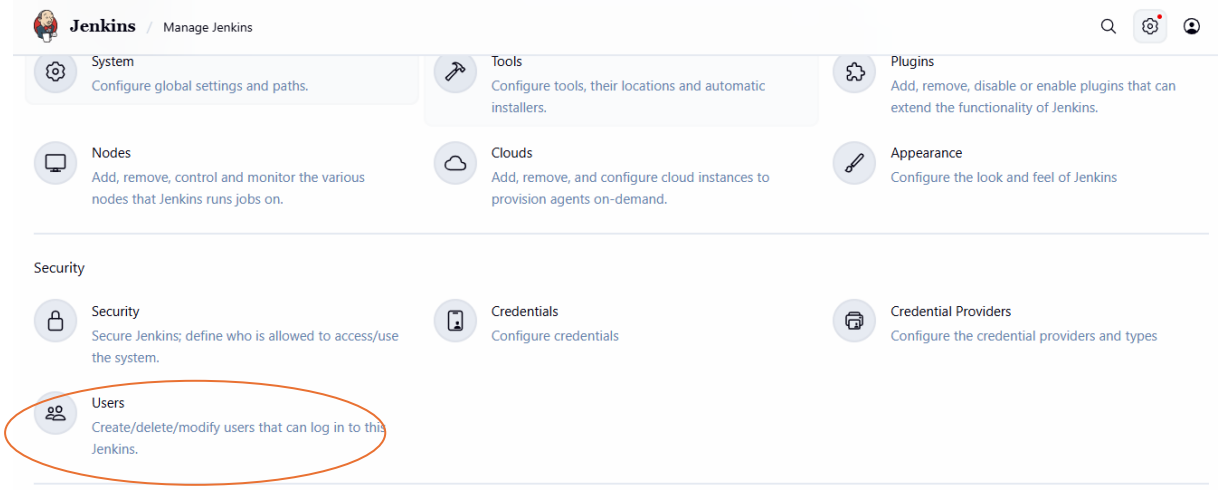
Step 1: Login to Jenkins

Step 2: Manage Jenkins to create one user in Jenkins

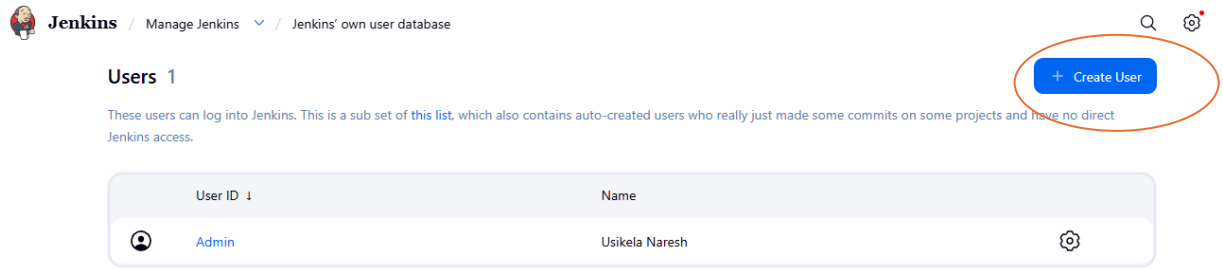


Click on manage Jenkins

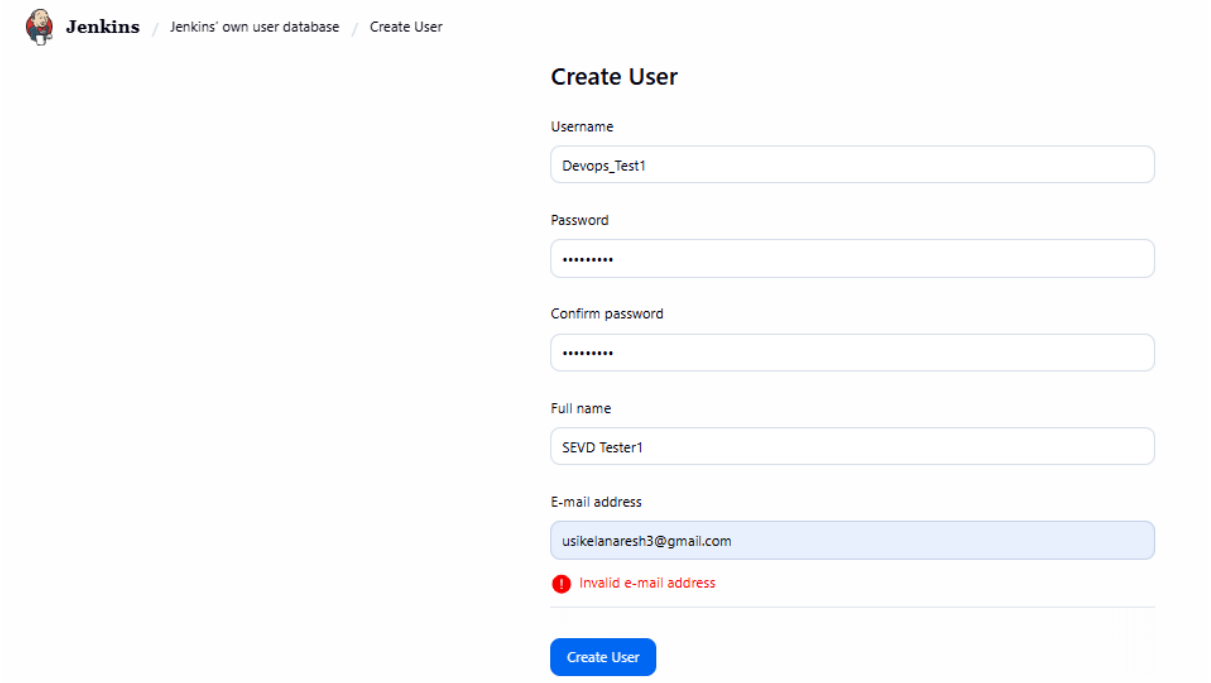
Click on users



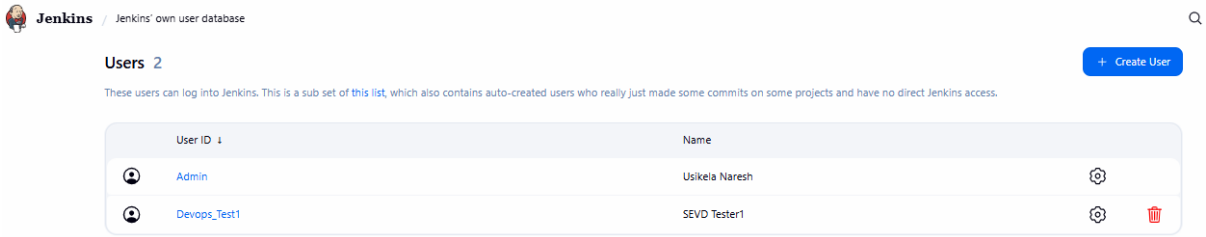
Then click on create user



Create user as

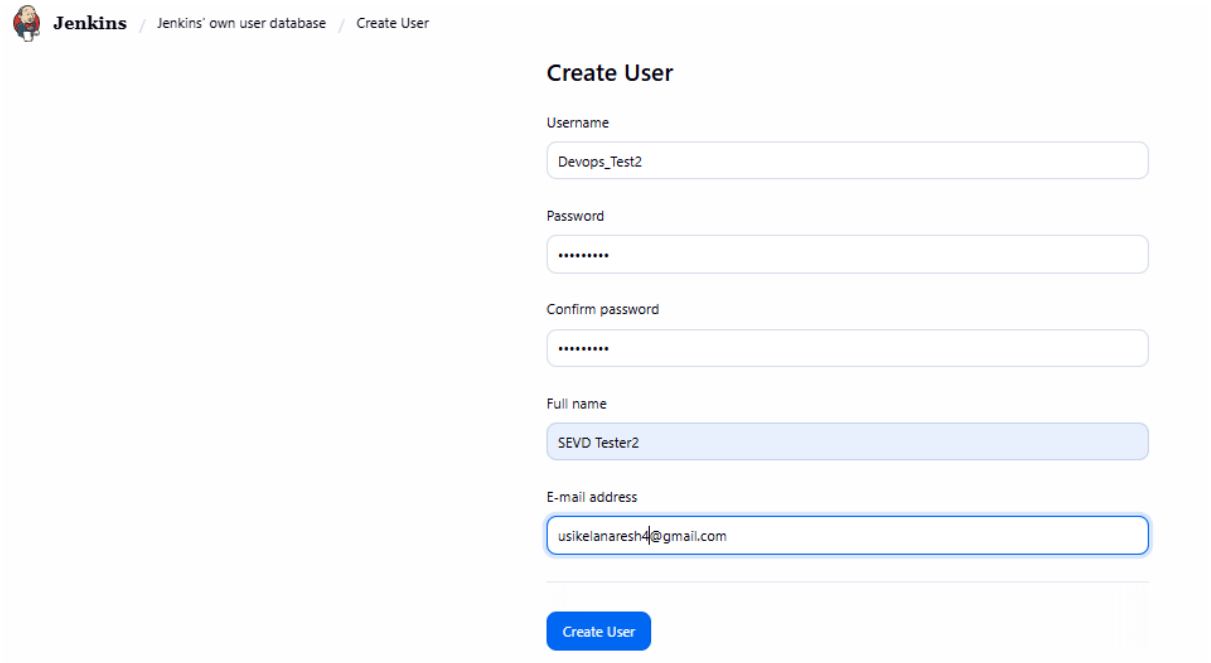


Now user Devops_Test1 user created

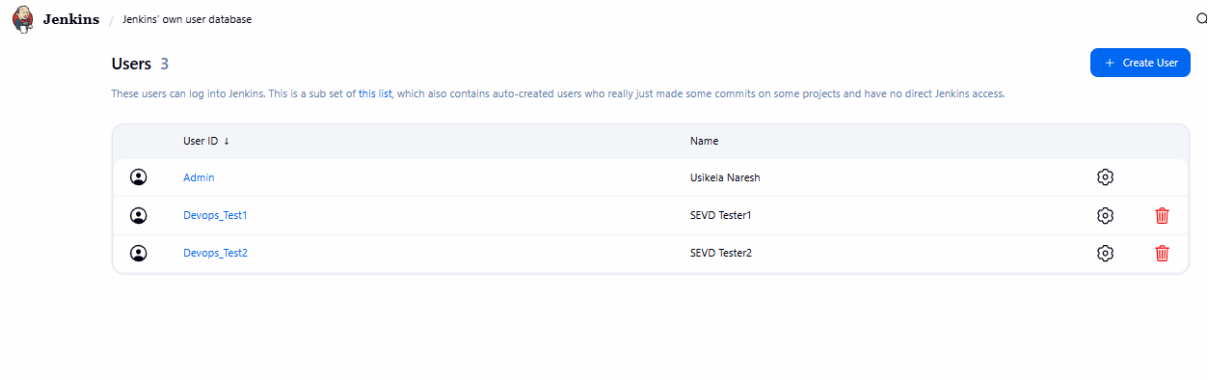


Step 3: Manage Jenkins to create second user in Jenkins

Click on create user

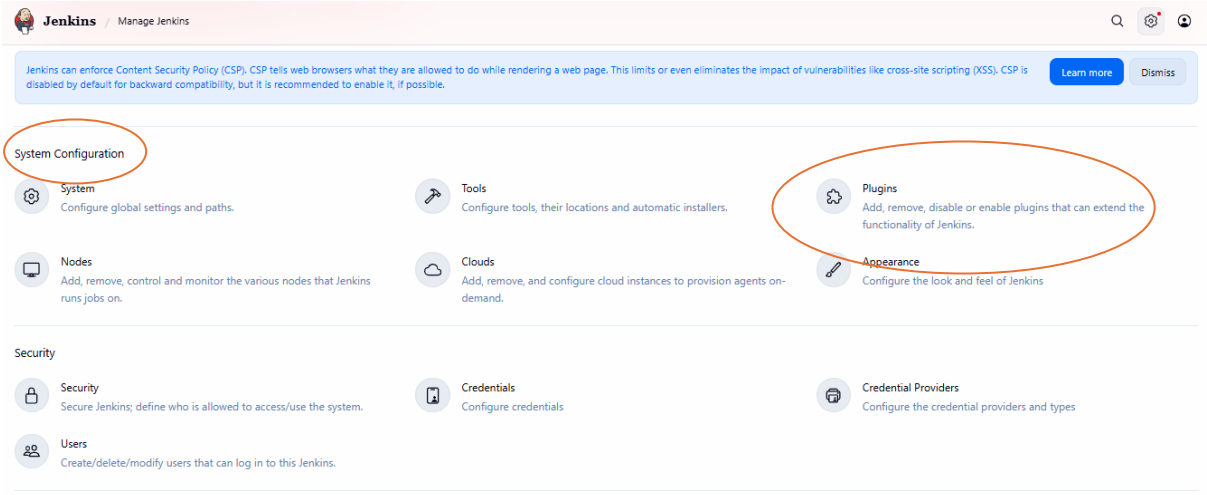


Now user Devops_Test2 user created

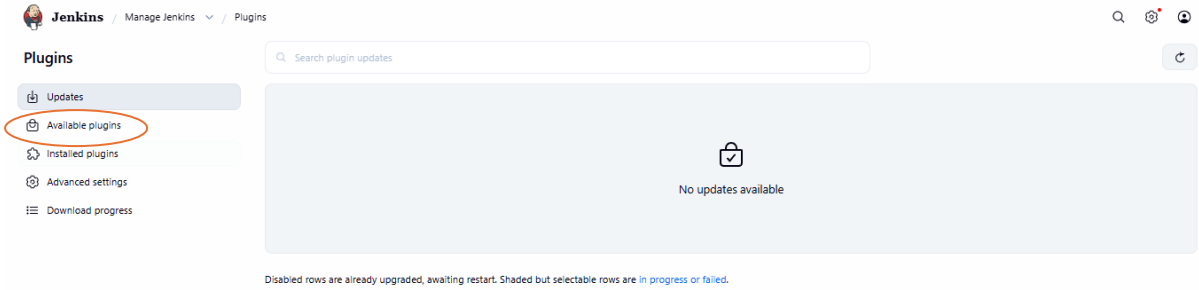


Step 4: Adding plugins

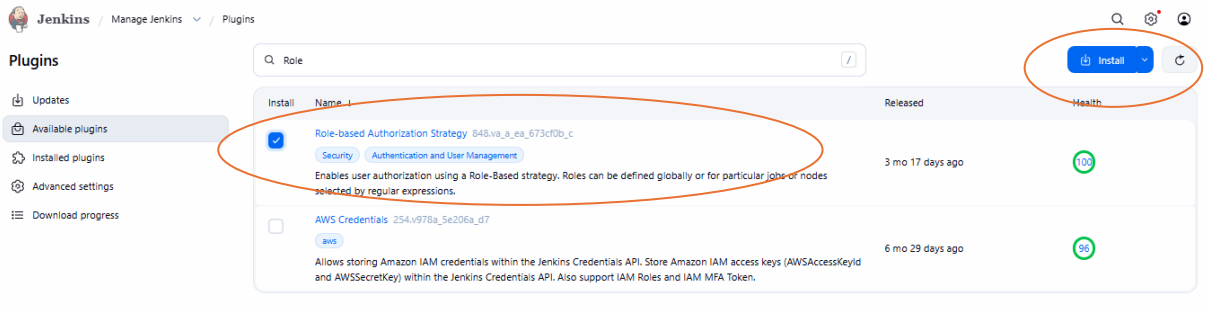
- Manage Jenkins → System Configuration → plugins

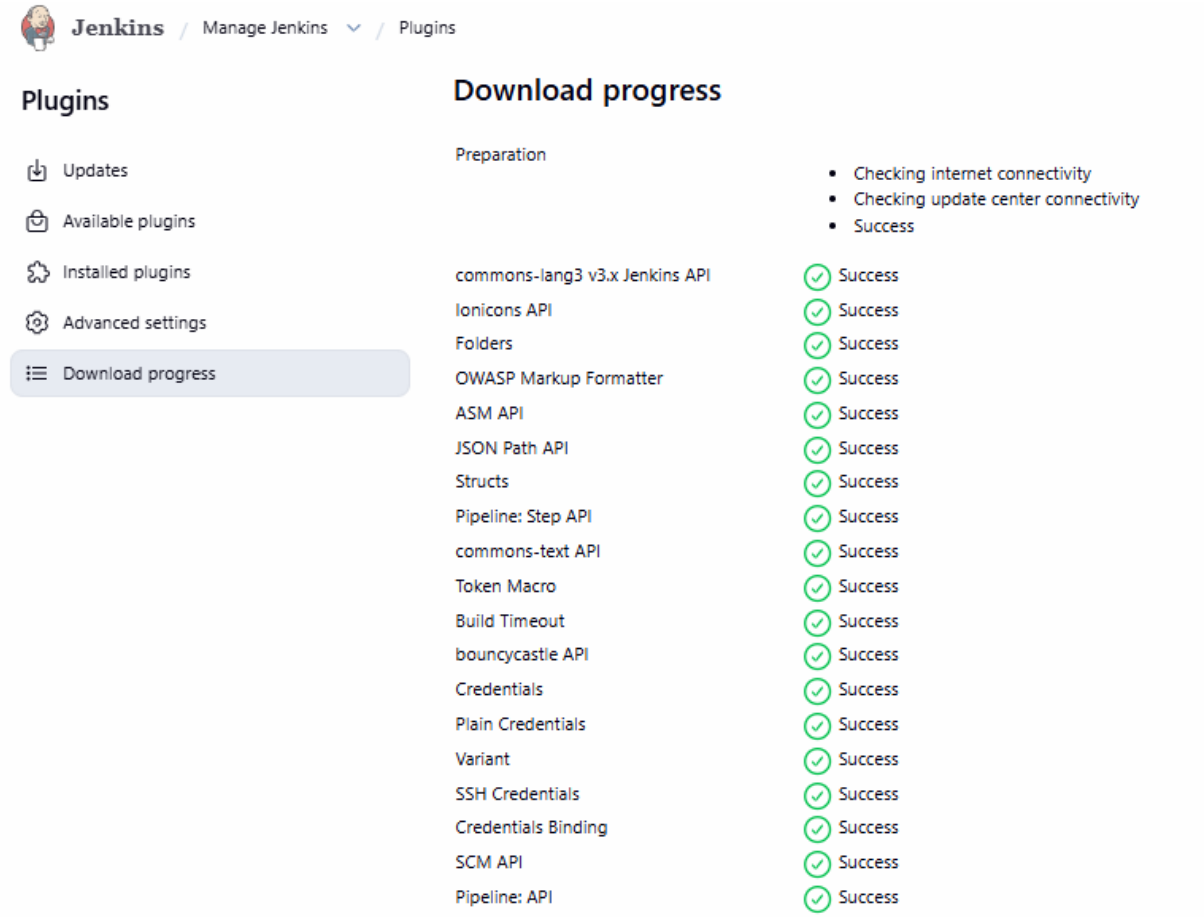


- Available plugins



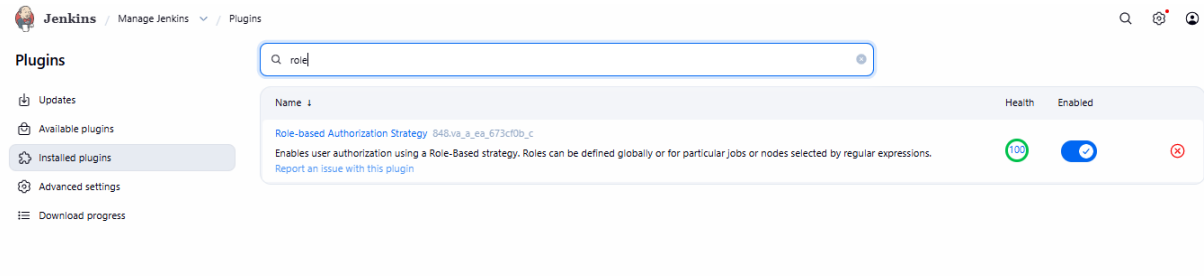
- Search as **Role-based Authorization Strategy** then install it





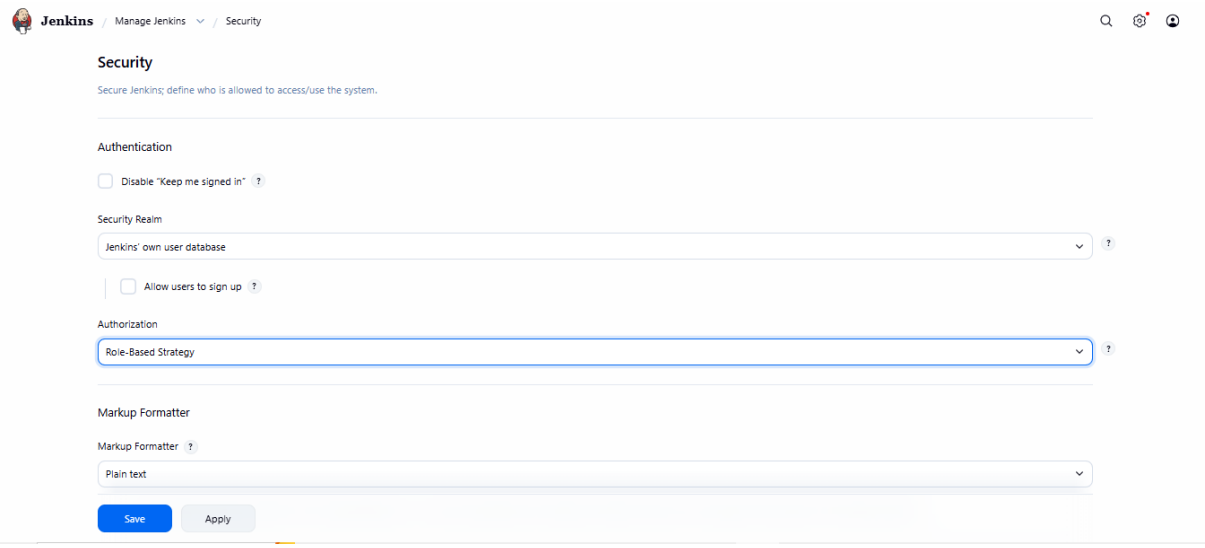
Step 5: Now check the installed plugins

- Installed Plugins
- Search as **Role-based Authorization Strategy**

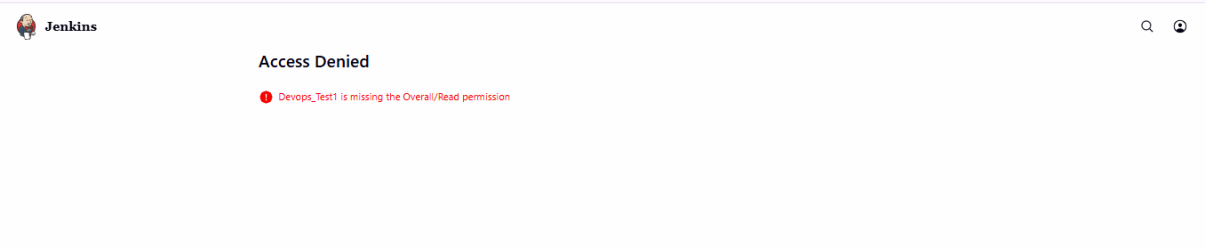


Step 6: Authorization

- Manage Jenkins-→ Security → Authorization
- Select **Role-based Authorization Strategy**
- Then click on Save and apply

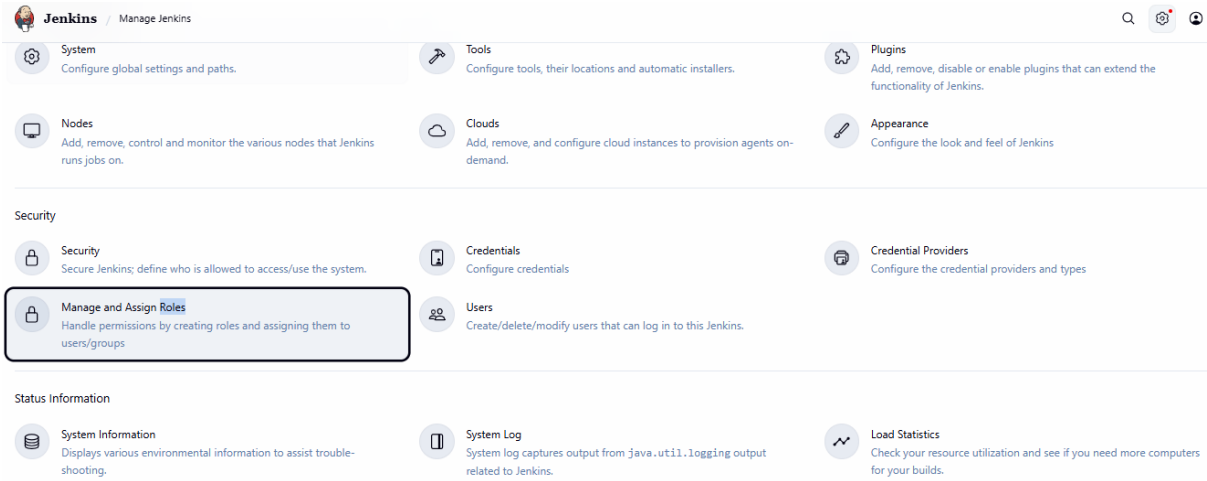


Step 7: Now logout Admin and login to Devops_Test1



Step 8: Now logout Devops_Test1 and login to Admin

- Manage Jenkins
- Manage and assign roles

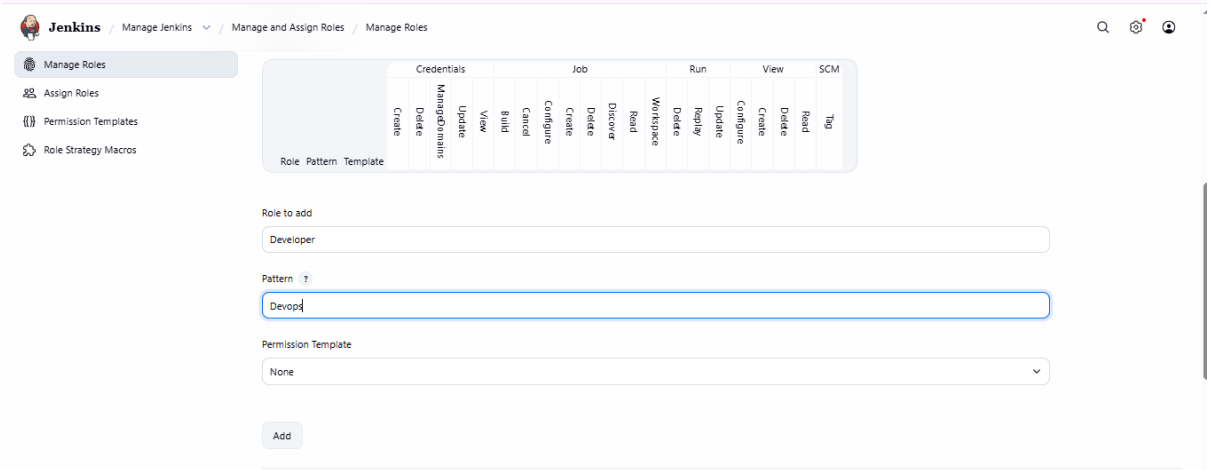


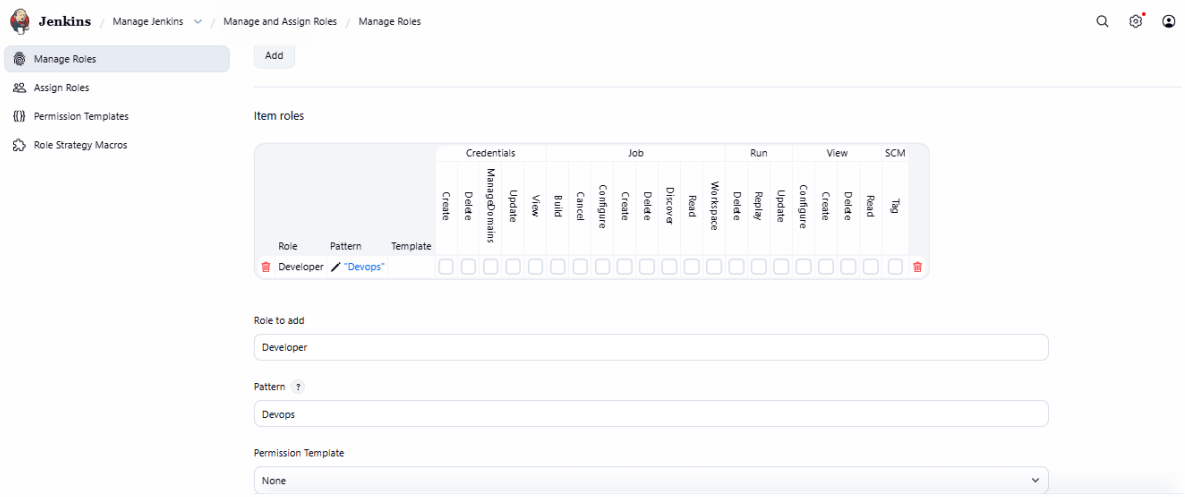
- Role to add
  - Emp1
  - Then click add option
  - In overall put tick for read

- In view put tick for all

➢ Role to add

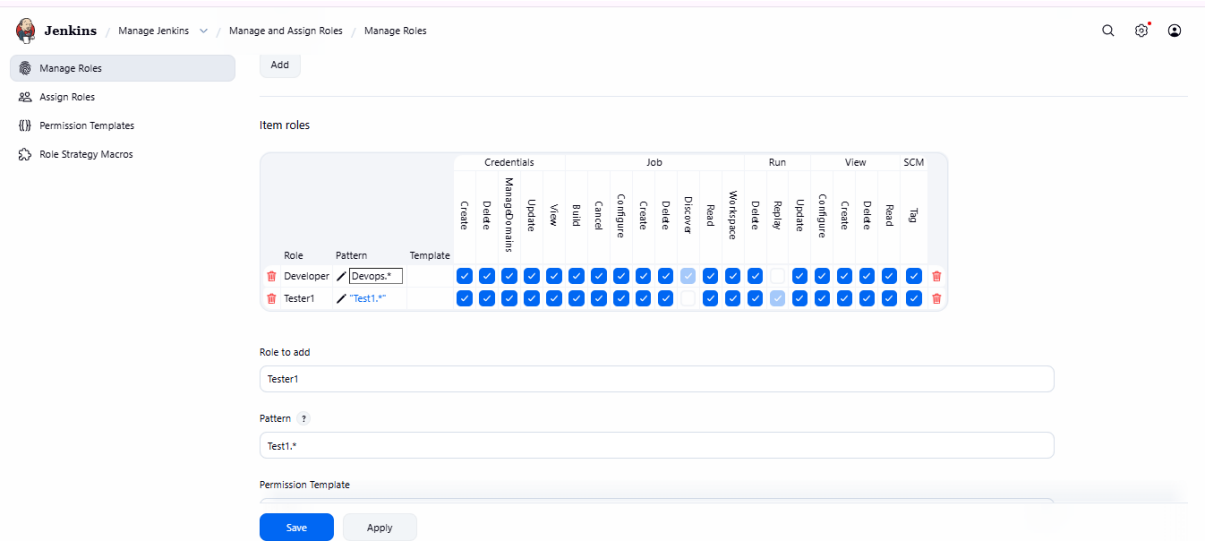
- Developer
- Pattern devops.*





➢ **Item Role**

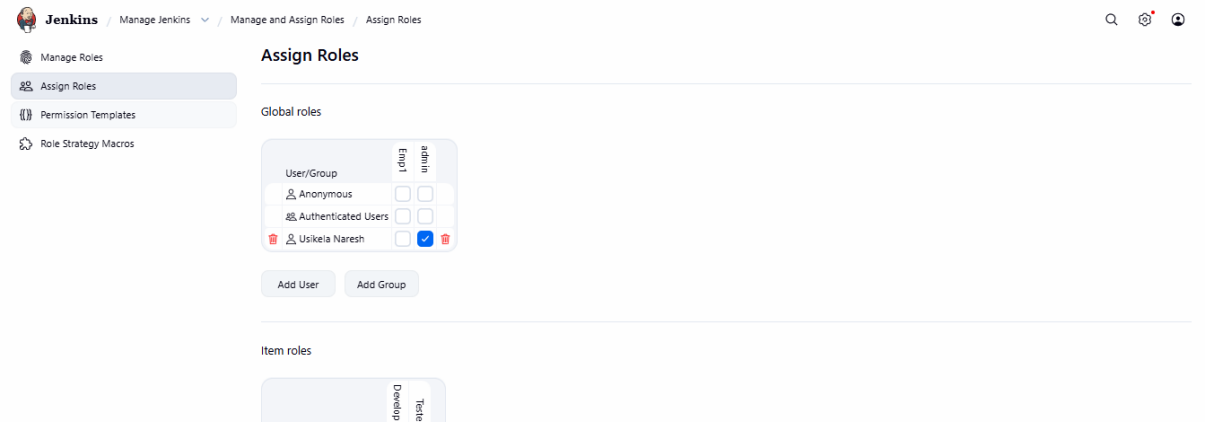
- Role to add
    - Tester1
    - Pattern Test1.*
    - Put tick for all



- Then click apply and save

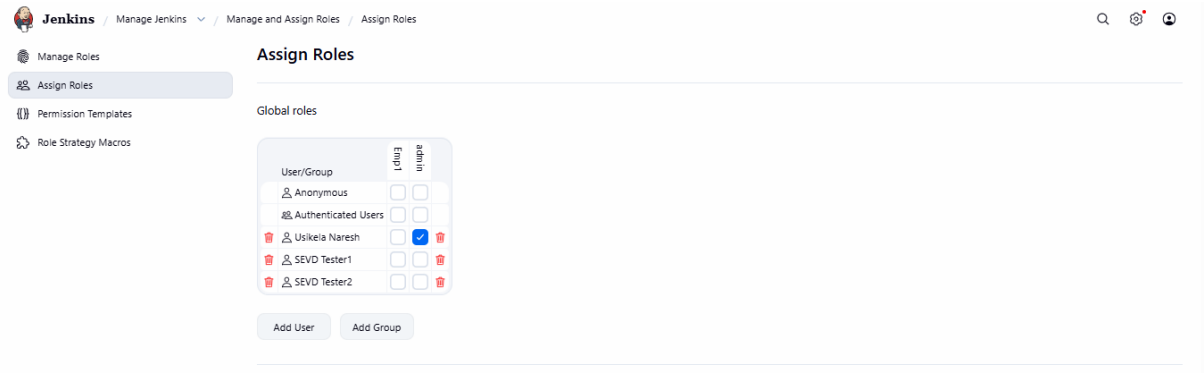
Step 9: Now give the permission to **Devops_Test1** user

- Manage Jenkins
- Manage and assign roles
- Manage roles
- Assign roles



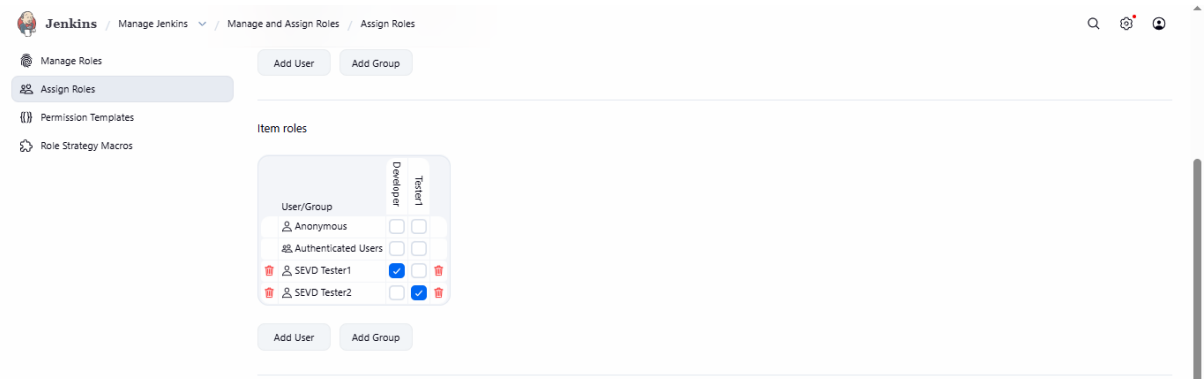
- Assign roles
    - **Gobal roles**

- Add Devops_Test1 and Devops_Test2
- Then give permission to user1 and user2 Employee



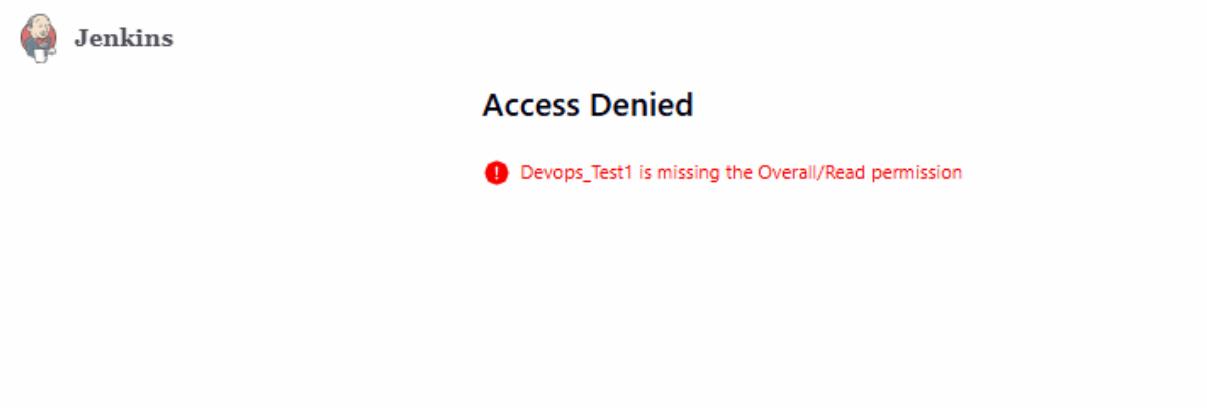
➢ **Item role**

- Add user1 and user2
- Then give permission to Devops_Test1 **Developer** and Devops_Test2 **Tester**
- Then click apply and save

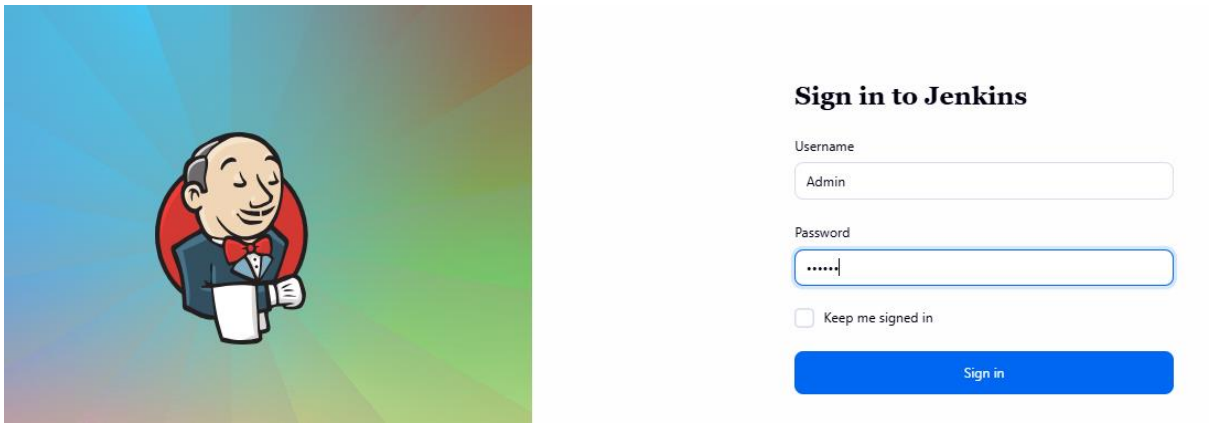


Step 10: Now logout **Admin** and login to **Devops_Test1**

Will get the error like

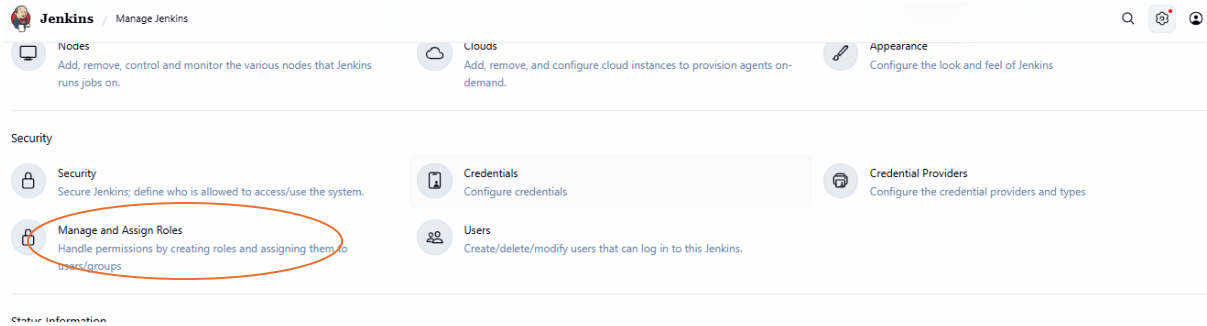


Then login to Admin and set the configuration

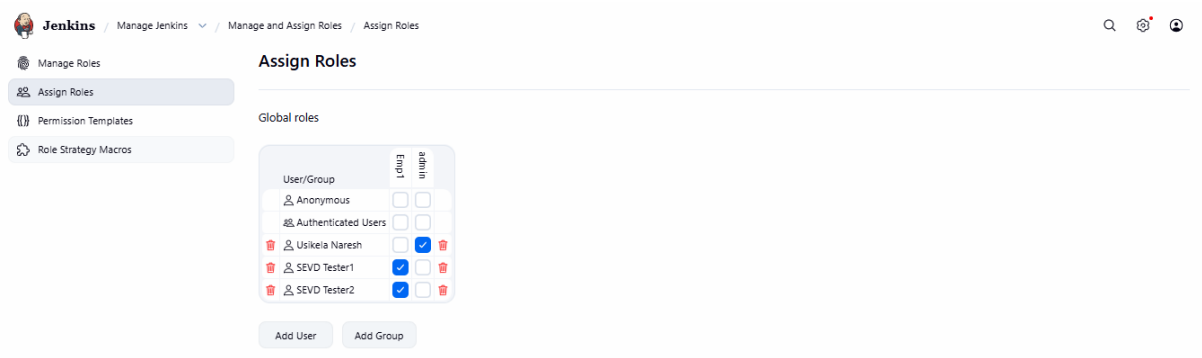


Manage Jenkins

Manage and assign roles



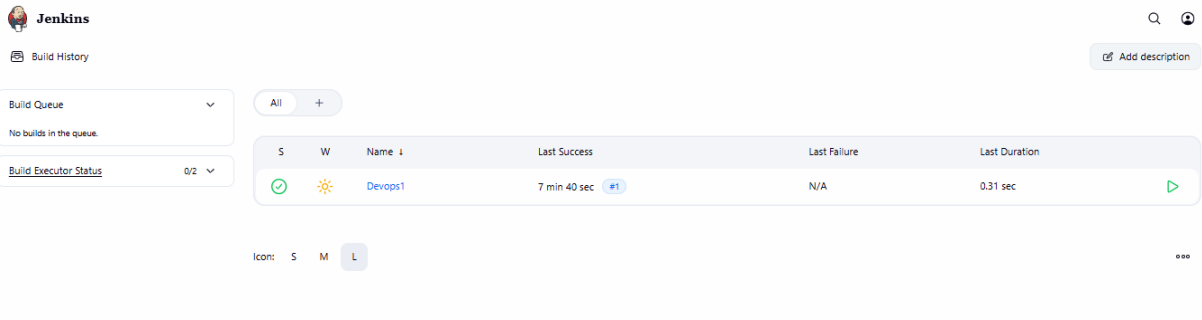
Assign roles



Here we have to check whether we are given a Emp1 role or not

Now login to **Devops_Test1** and **Devops_Test2** users

Devops_Test1 login



Devops_Test2 login

If we want get access of builder file in admin to user Devops_Test2

Login to Admin user →Manage Jenkins →Manage and assign role → Assign role →Global roles

Add Devops_Test1 and Devops_Test2

Tick for Emp1 for both

Now check the status of Project in **Admin** user

Jenkins / Devops1 / #5

- Status
- Changes
- Console Output
- Edit Build Information
- Delete build '#5'
- Timings
- Previous Build

Console

```
Started by user Usikela Naresh
Running as SYSTEM
Building in workspace C:\ProgramData\Jenkins\.jenkins\workspace\Devops1
Finished: SUCCESS
```
