Task: Schedule build jobs in Jenkins using POLL SCM and Build Periodically

Open Your Job in Jenkins

1. Go to **Jenkins Dashboard**
2. Click on your **Project/Job**
3. Click **Configure**

Build Periodically (Time-based scheduling)

This runs the job at fixed time intervals.

Scroll to Build Triggers
Check ☑ Build periodically
In the Schedule box, enter a cron expression

Example:
H/5 * * * * (Runs every 5 minutes)

0 9 * * * (Runs every day at 9 AM)

POLL SCM (Check Git changes)

This checks your repository for changes and triggers a build only if changes are found.

Check ☑ Poll SCM

Enter cron expression

Example:

H/2 * * * * (Checks Git repo every 2 minutes)

Builds only if changes are detected

Jenkins / Jenkins Test / Configure

Configure

- General
- Source Code Management
- Triggers
- Environment
- Build Steps
- Post-build Actions

Triggers

Set up automated actions that start your build based on specific events, like code changes or scheduled times.

- [ ] Trigger builds remotely (e.g., from scripts) ?
- [ ] Build after other projects are built ?
- [x] Build periodically ?

Schedule ?

```
H/5 * * * *
```

Would last have run at Friday, 20 March 2026 at 14:56:00 India Standard Time; would next run at Friday, 20 March 2026 at 15:01:00 India Standard Time.

- [ ] GitHub hook trigger for GITScm polling ?
- [x] Poll SCM ?

Schedule ?

```
H/2 * * * *
```

Would last have run at Friday, 20 March 2026 at 15:00:00 India Standard Time; would next run at Friday, 20 March 2026 at 15:02:00 India Standard Time.
